## The Next Generation Sport Tourer in Maxi Scooter Segment

### **The Impeccable Tour is Calling**

#### Journeys with splendid highlights

SYM unveiled the premium sport tourer “TTLBT” with a class-leading specification in its seventieth anniversary. The TTLBT delivers next generation functionality, versatility and maneuverability. Whether your destination is near or far, TTLBT is the most exhilarating way to travel.

The concept of BT series is based on historical orient culture. Coming after FNXBT (Fenice), DRGBT (Drago) and KRNBT (Kirin), as the new beginning of BT (Bestia) series, TTLBT is named under “Tartaruga” which is turtle in Italian. Essentially the TTLBT has superb top-of-the-range handling; various touring utilities are loaded to this sport touring machine.

- **Upright rider triangle, roomy cockpit, 780 mm low seat height and 3-position adjustable waist rest are exclusive privileges for pleased journeys.**
- **Generous storage capability contains 37 L under seat volume plus standard equipped 14.4 L and 13.6 L easy install panniers, the rear carrier is able to mount a large top box additionally.**
- **Layout improved front compartment that enhances practicality. USB Type-C charger in the smart phone compartment.**

- **Incline variable electric windscreen offers extraordinary convenience and fatigue restraining.**
- **4-level heating grips hugely enhances touring comfort no matter in chilly weather or at high altitudes.**

The ride by wire technology brings cruise control to this touring master, makes every road trip easy as pie. The powerful 508 c.c. powertrain now paired “normal” and “rain” ride modes for the rider to adapt dry and wet conditions. The robust 7-inch TFT touch display offers three selectable display schemes, day/night mode and multilingual menu.

- **Advanced smart key system with geometric style and functional upgrades. Close range sensing, auto unlock steering stem and remote open seat.**
- **Cruise control can be active above 50 km/h.**
- **Vitesco EMS offers “Normal with TCS” (full power with TCS), “Normal” (full power without TCS) and “Rain” (restrained power with TCS) modes to release all engine power or to suit circumstances require gentle output.**
