The New Definition Luxury Sport Tourer

The refined CRUISYM: CRUISYM 400

The CRUISYM 400 is SYM's automobile grade luxury sport tourer based on the MAXSYM GT platform. Adapting modern hi-end, high quality styling and high-tech equipment, the CRUISYM 400 is aimed to be the new benchmark in its segment.

- **“Floating” and “dimensional layering” as primal design language that represent light and flying visual experience.**
- **The sharp and sporty sense of beauty comes from the naked projective LED headlamps, sturdy shape LED position lights and floating brushed garnish.**
- **The liner matrix concept can be seen on the headlight set garnish and the rear LED lights which improves technological and upscale feeling.**
- **Automobile grade front-located back mirrors with built-in LED turn signals.**

The impressive touring functionality is reserved and upgraded. The sporty adjustable windscreen, comfortable double seat, 780 mm low seat height and 3-position adjustable waist rest designed for pleased riding experiences. The turn-by-turn navigation provided by the T-box smartphone connection is a big advantage when the rider visits unfamiliar areas.

- **42 litre luggage box holds ample storage utility for all-round scenarios.**

- **Tire temperature warning is added to the TPMS, safety coverage is enhanced.**
- **1080P vehicle camcorder (front and rear lens) is equipped as standard.**
- **Smart key system with new multifunctional ignition cluster and individual fuel lid/seat open buttons. This new cluster integrates USB Type-C and QC 3.0 charging ports. Immobilizer and close range sensing are also included.**

The high-tech side comes from the 7-inch floating TFT LCD display and the all-in-one T-box smartphone connection. The SYM app monitors vehicle information such as TPMS values, parking location and fuel consumption. There are also various user oriented gadgets in the app to better the rider's experience: camcorder access, ignition cluster remote lock/unlock and anti-theft warning. The high quality 7-inch TFT LCD instrument is applied modernized floating design, besides ambient temperature display, three display schemes, day/night mode auto dimmer; the rider can utilize the turn-by-turn navigation to enjoy every delightful journeys.
